About This Game

Having ended up on an abandoned remote island you find yourself in a life and death battle against the evil coming straight from perdition.
Enter a terrifying multiplayer horror experience featuring sessions for up to five players, where any one of them has chance of becoming the bone chilling demonic entity that will try to slaughter the rest of the group.

Daemonical is an asymmetrical horror multiplayer game in which a group of people find an unfinished demon summoning ritual. With the demonic entity released upon the island, the players must find a way to send it back to hell or end up slaughtered.

Never knowing which one of them has become possessed by the demon, it is their decision to make on if they want to team up and trust each other or try surviving alone.

The humans are played in the first-person mode. In order to exorcise the demon, they need to find the missing ritual components and bring them back to the alter. Their only alternative is hiding and surviving until the dawn, when the sunlight will purge the demon from the grounds. They can use fire, which hurts the demon, or weapons and tools hidden around the island to their advantage. While the demon can't be killed, he can be crippled, stalled and distracted.
The demon is played in the third person, needs to simply slaughter all the humans and prevent them from finishing the ritual. He is fast, agile, powerful and deadly.

The humans are stronger when they band together, but they are easier to find. Stay together or split up to avoid ending up in a group with a demon – it is for you to choose.

Will you go for the missing ritual parts, or just try to hide until dawn? Will you help the others, or just be a lone wolf – the game leaves that up to you.

When a player dies in the game, their soul gets separated from their body and they can float around the map in the shape of a glowing ball of light. He can light the way for the players, and find the demon and follow him so the others can see where he is.

Daemonical also features a positional voice chat, so you can tell the other players that are close to you your plan, or pick a strategy together, but be careful! The demon might be listening in.

Customize your character – pick your gender, choose between various player models, clothes, colors and symbols that you can put on your clothing.

Key Features:

- Asymmetrical multiplayer

- First person and third person playing mode

- Dynamic time of day and weather system

- Most of the map is procedurally generated

- Tools and weapons randomly placed across the map

- Big open landscapes

- Positional voice communication

- Fully customizable characters

- Interesting locations and landmarks

- Nonlinear gameplay

- The most terrifying hide and seek experience in gaming

- Scare your friends, or get scared with your friends!

ed my PC up.. okay let me review this game .
but one thing , i seem didn't see any server or was i just stupid ? but whatever .
Pros = parkour , jumping shot , classes
Cons = Bad Mechanic , Bad animation , Bad Sounds Effect , bad system .
- So i got this game for free from a giveaway website , and i decided to try it . first of all , i tried max the graphics and stuff like that it worked out pretty bad . so that's the cons for this game . bad system rendering (is it call like that?)
i tried all the weapons the guns is so limited and it's animation is bad , i felt so bad playing this game and just want to quit as soon as i can . maybe they'll develop more about this game , but beyond that . nope . not recomended.. G O O D G A M E. It's the most boring game I've play. First of all, I'm fan of tycoons, strategies and simulation games. I have never disliked a tycoon game before.
But this one, it just doensn't have a clear goal. You must choose scene after scene (there are a lot of them) prep it all, but the results are the same if you did it on the auto mode, pick only the first and last scene and let it roll.
There's no fun or strategy in that. If I could, I would try to get a refund for the first time in my life. Yes, it's that bad.. Portal 2 did everything better that made it's previous sequel (portal) special and built it's legacy.
Sci-fi puzzle, Great sequel, Gravity Mechanics, well constructed and funny jokes. thank you VALVE for this absolute masterpiece. 10\/10

First purchased this back in the DK2 days. It has improved massively. Great attention to detail like dust particles and condensation in cockpit. Sunlight bouncing off cockpit glass. Space tours are a great addition. Control scheme is now VR controller and very well thought out.

Very nice flying low over planets with atmosphere (given how Elite is lacking this feature).

Relaxing and atmospheric space flight sim.
. So....sold my csgo inventory to buy this game. Havent been this disapointed in awhile. Game seems like a cheap rip+off of State of decay. but a lot worse. this isnt gonna get any better then it is in alpha... simple yet too basic when u think about the games that are out there.... This is a game that I enjoy for something different. Keeps the mind active but I would suggest the the first time you play select the slow options first.
For the price I think it is a reasonable buy and I look forward to some updates later on.. Really cool idea for a VR game. The difficulty feels pretty balanced and there seems to be a good amount of content (I didn't complete it all). Has good potential in becoming an awesome game.

https:\/\/www.youtube.com\/watch?v=hMHXHUuMWTE. The series as a whole before the individual game

The series is great. However, their is a warning, the set of games, especially the last one, are harder than most of these type of games. The writing is great, the stats carry over between games, different events can happen based on the stats you have or what classes you choose. However, for your first run, expect to fail. However, there is a lot of replay value in these games and they are very enjoyable.

This last game is the climactic conclusion to the story. Your character will learn about the demons and search for an artifact to fight them before the big final battle. Once again, more classes, bringing the total amount of classes your character can be to a whopping 35 classes. The mechanic of managing the ship, which helps bring you to the artifact, is not as fun or as extensive as managing the army in the previous game. There is however, a major plot thing that can be fun at the end. After you find the artifact, your character has to turn himself into a demon so he/she can perminantly kill other demons. Failing checks in this part can cause your character to become more demonic, giving bonuses but also getting you closer to bad endings. There are several endings in this game, of which there are (I think) 2 good endings and 6 bad ones. That said, I really like the game. It does some interesting things that many of these games don't try, and still offers a lot of choice for playstyle.. You feel so smart after getting the hang of these.. A really good game that players of rpg's would love to play. broken menu button ,stuck on tutorial DON'T waste your money its been broken for months and dev's are not doing a thing to fix it

Version 1.02 Update:
1. Add Option button to Start Scene, allowing for screen resolution adjustment and volume adjustment.
2. Battlefield View now has 3 gears. You can use mouse wheel slide to switch.
3. The cruiser needs a second confirmation when using radar.
I need more game reviews.Thank you for your support.
Forecast for next Update:
Adjust some commander skills, optimize the game operation related to the mouse.
Update in the future
Add support to keyboard and controller, and enhance the performance of all kinds of art.
. **Version 1.28.2019 Skinwalker Multiplayer Update**:
Patch Includes:

- Improved skinwalker pathfinding

- Skinwalker is now aware of multiple players

- Skinwalker will no longer disable unless another player(s) becomes the skinwalker(s)

- Skinwalker health will increase for every player that joins

- Skinwalker seems a bit more "unpredictable"

- Skinwalker audio sync for mp

- Added death cam to Blackwater

- Death cam activation delayed by 10 seconds

- Changed arbitrary multiplayer cap from 4 players to 8 players (Let me know if you want more and how this works. I don't have 8 people to test)

Plans for next patch:

- Add indicator to the church escape

- Improve ladder behavior in the corn farm barn

- Free roam at the beginning of multiplayer

Known Issues:

- Players are not kicked when hosts leaves on Blackwater (fixed in future update)

- Deer movements are not synced

- Thunder is not synced

Have questions or feedback? Find a bug?
[Start a discussion](#) and I will fix it!

. **Kitty now has a Steam page!**:
Congratulations! The game now has a page in Steam.

You will help the kitten very much if you put custom tags! Put everything that comes up!

We plan to release game in August.. 12□07□06□30□□□□□□□□□□□□□□□□□:
